## Did you know?

The blue light in all electronic devices

- Mobile phones
- Laptops
- Ipads
- Televisions

Activate the brain and encourage it to be stimulated. This will not help students get to sleep, it will keep them awake.

You can: turn off all devices 1 hour before sleep or download an app called Blue Light Filter— which will take the blue light out of your mobile phone. Set it to turn off 1 hour before sleep.

#### **Kids Matter**
