Cybersafety

It has come to our attention that some of our students are playing two online games

Roblox and Fortnite

The average gamer is a 35 year old male!

Roblox

What is it?

Roblox is a massive multi-player online game creation platform that allows users to design their own games and play a wide variety of different types of games created by other users through Roblox Studio.

Is it safe?

If your child creates their own Roblox game, it will go Public when it is launched. You cannot block other players from playing except players under 13+. There is no way to stop your child from having multiple Roblox accounts on the one device. Players can have several accounts. **People over 13 CANNOT be blocked.** Your child could be communicating with unsafe people.

Police have found predators on these online games.

Fortnite

What is it?

Fortnite is a video game that takes elements from sandbox-building games and adds the fast-paced action of a third-person shooter. There are two modes to the game: a solo version called **Save the World** and the hugely popular multiplayer version called **Battle Royale.**

Is it safe?

For some parents, the cartoonish, bloodless style of the action in *Fortnite* makes the violence less problematic than the aggressive gore in other popular shooter games. But the game's online chat feature -- especially in *Battle Royale* - **exposes younger players to offensive language or mature content from random strangers.** *Common Sense* doesn't recommend games with open chat for kids under 13.
